

paytm

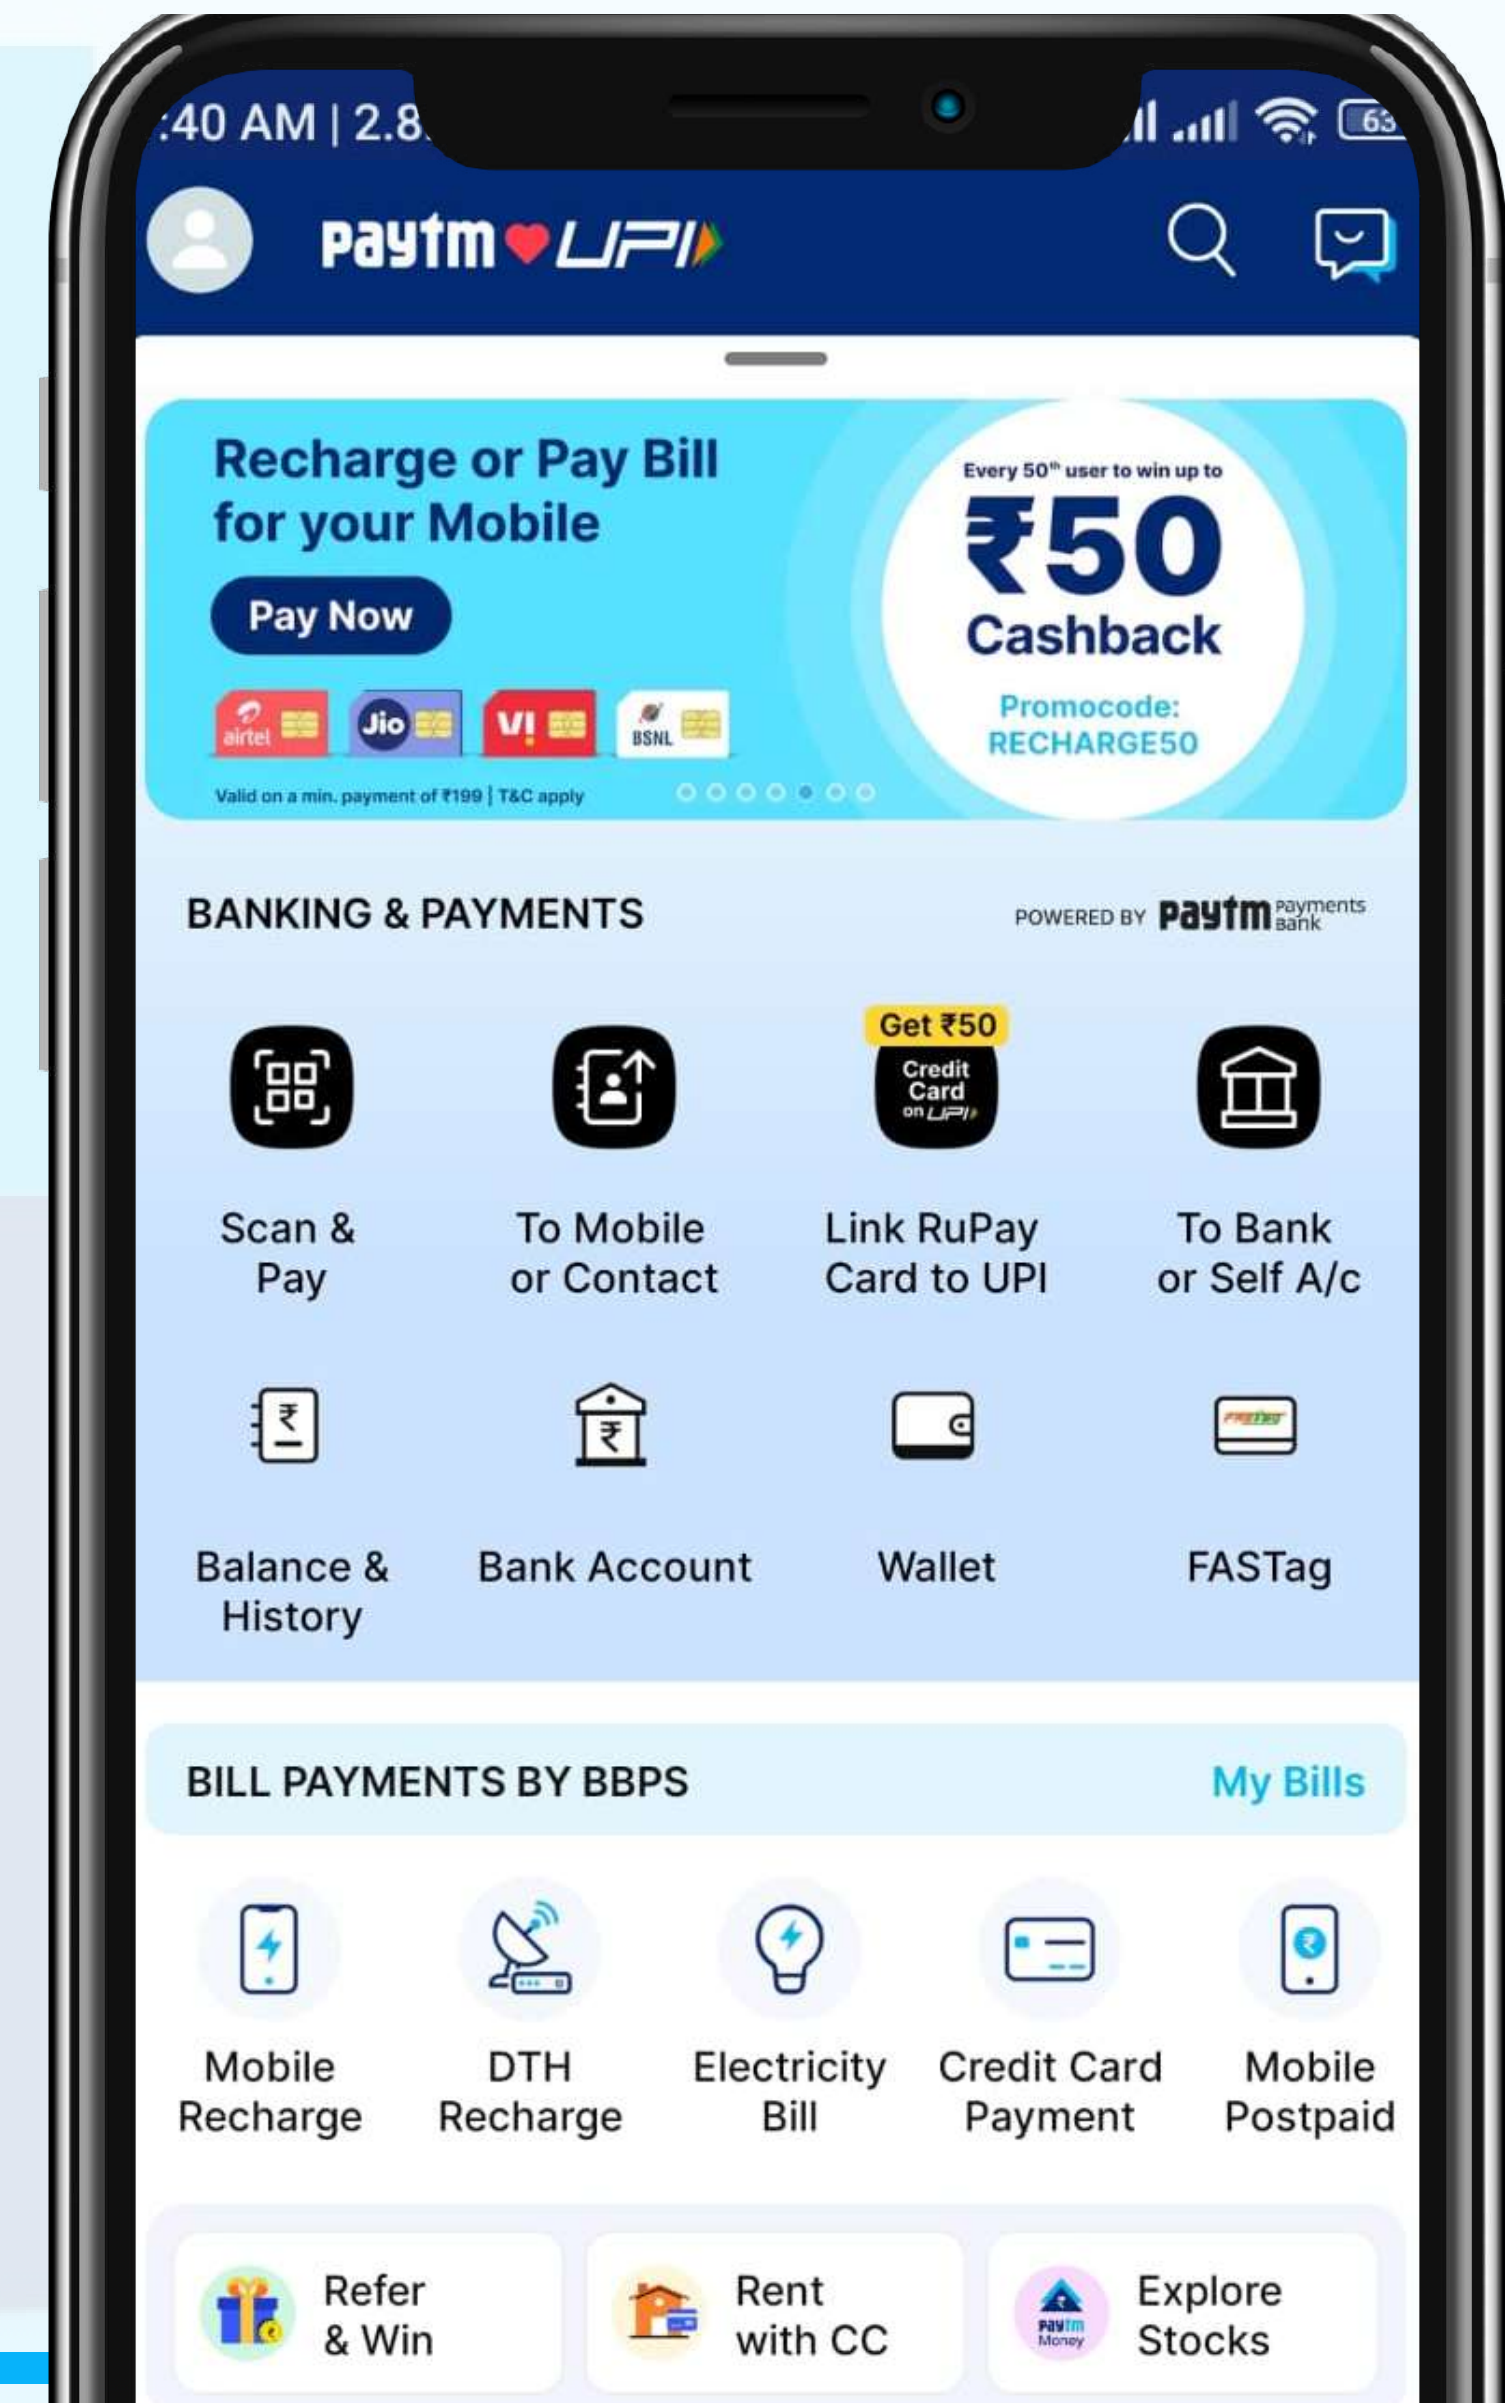

About Us!

We are a team of Product Enthusiast from **IIT Kharagpur**.

We are thrilled to share our work on problem statement -
Improving Paytm's User Experience

paytm

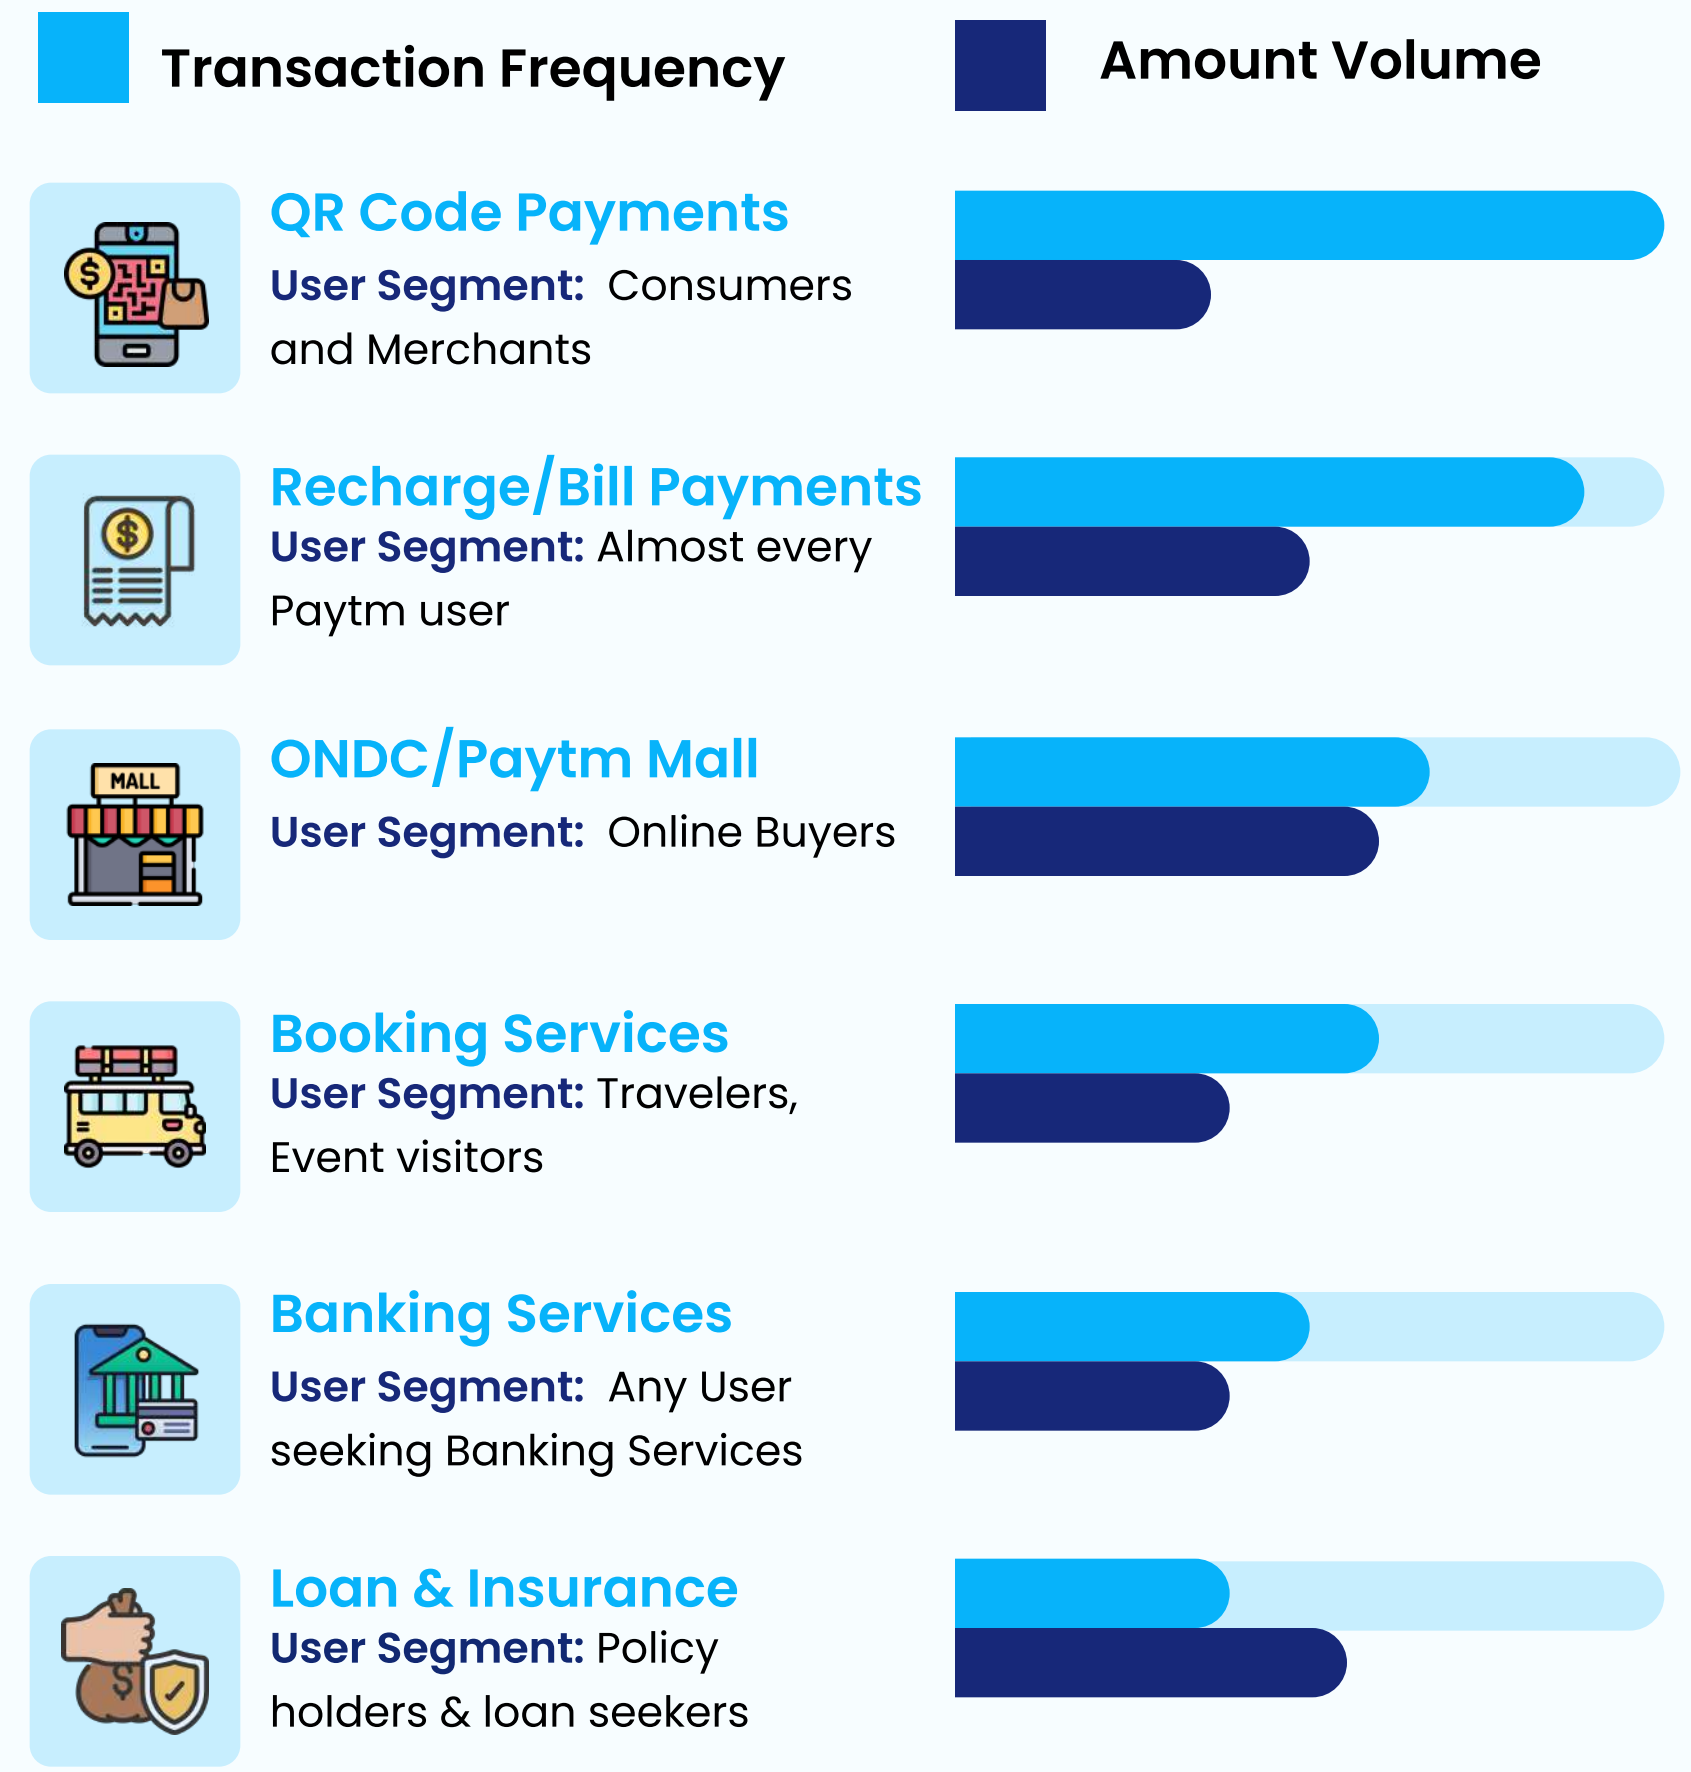

UX IMPROVEMENT

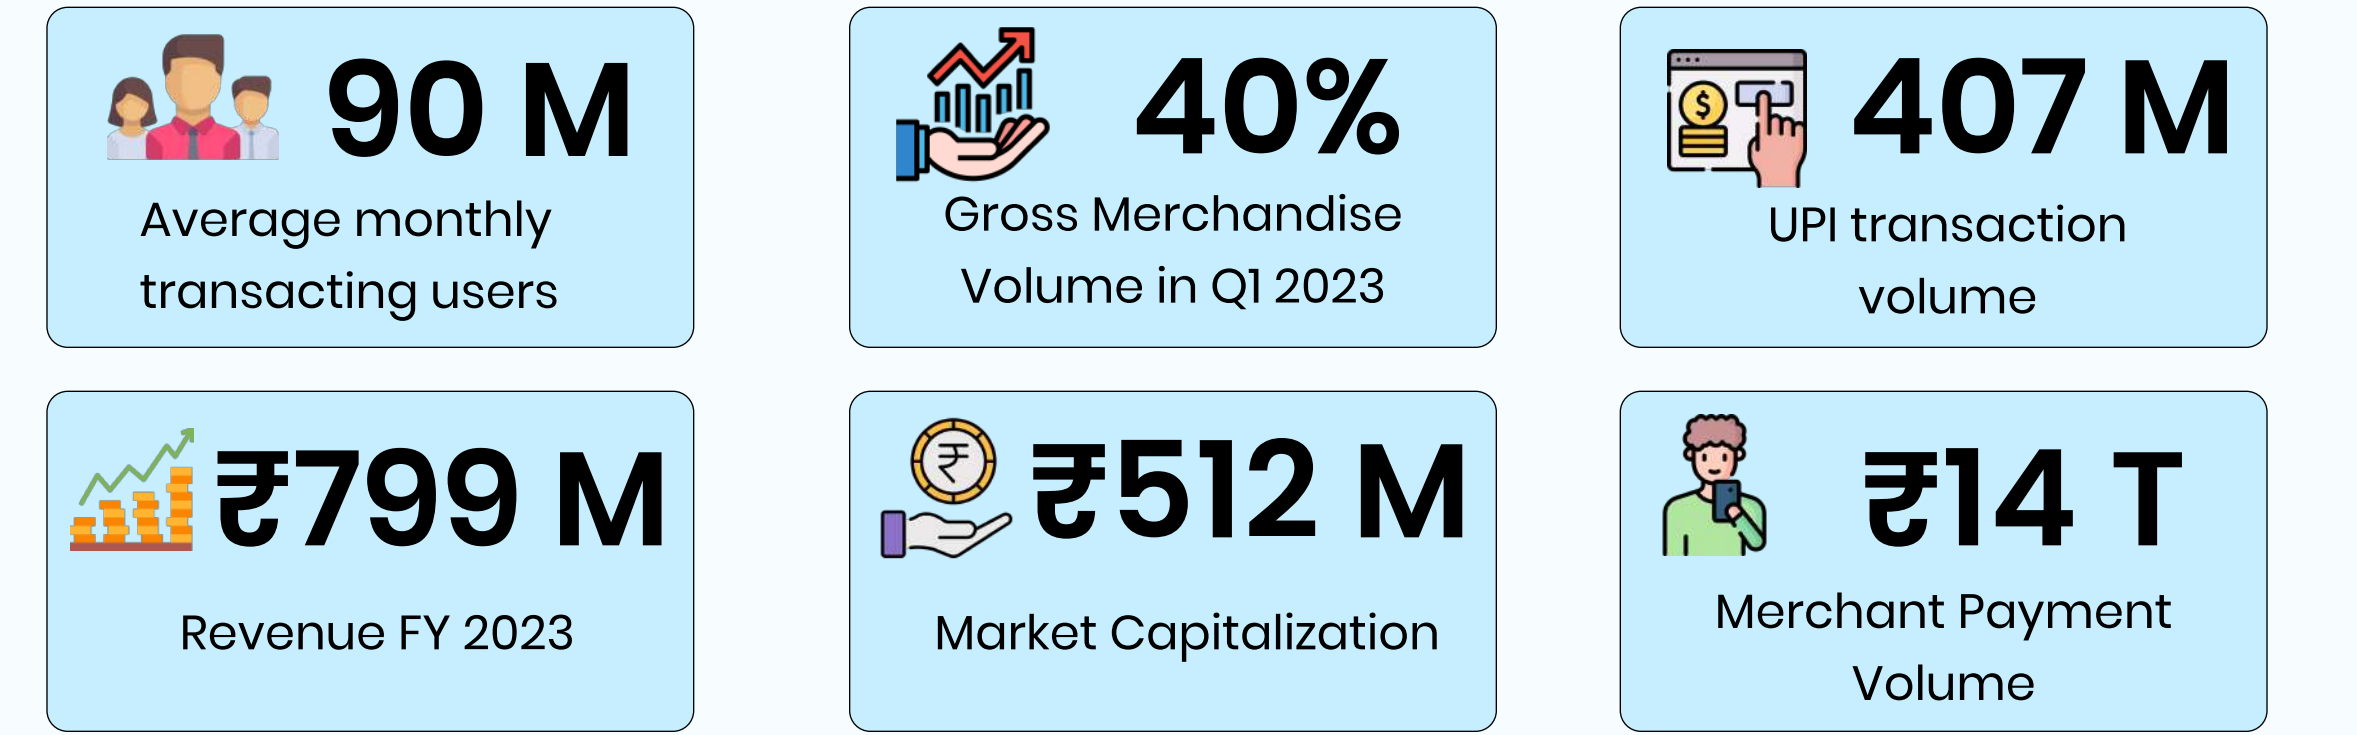

About

Paytm is an Indian **digital payment** and **e-commerce** platform that was founded in 2010 by Vijay Shekhar Sharma. Originally launched as a mobile recharge and bill payment service, it has since evolved into a comprehensive financial services provider with a wide range of offerings

Top Features

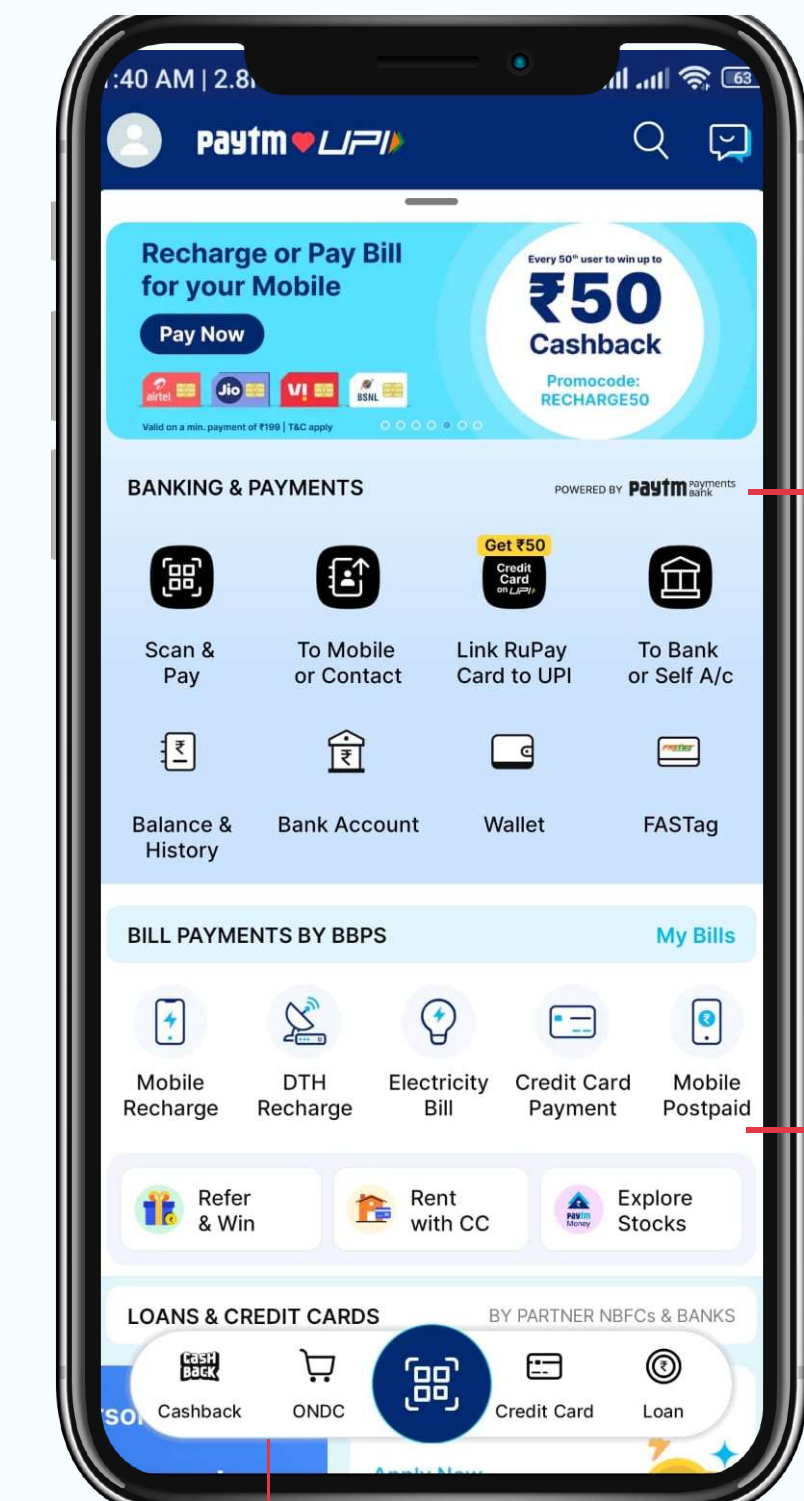

Statistics

Swipe Up

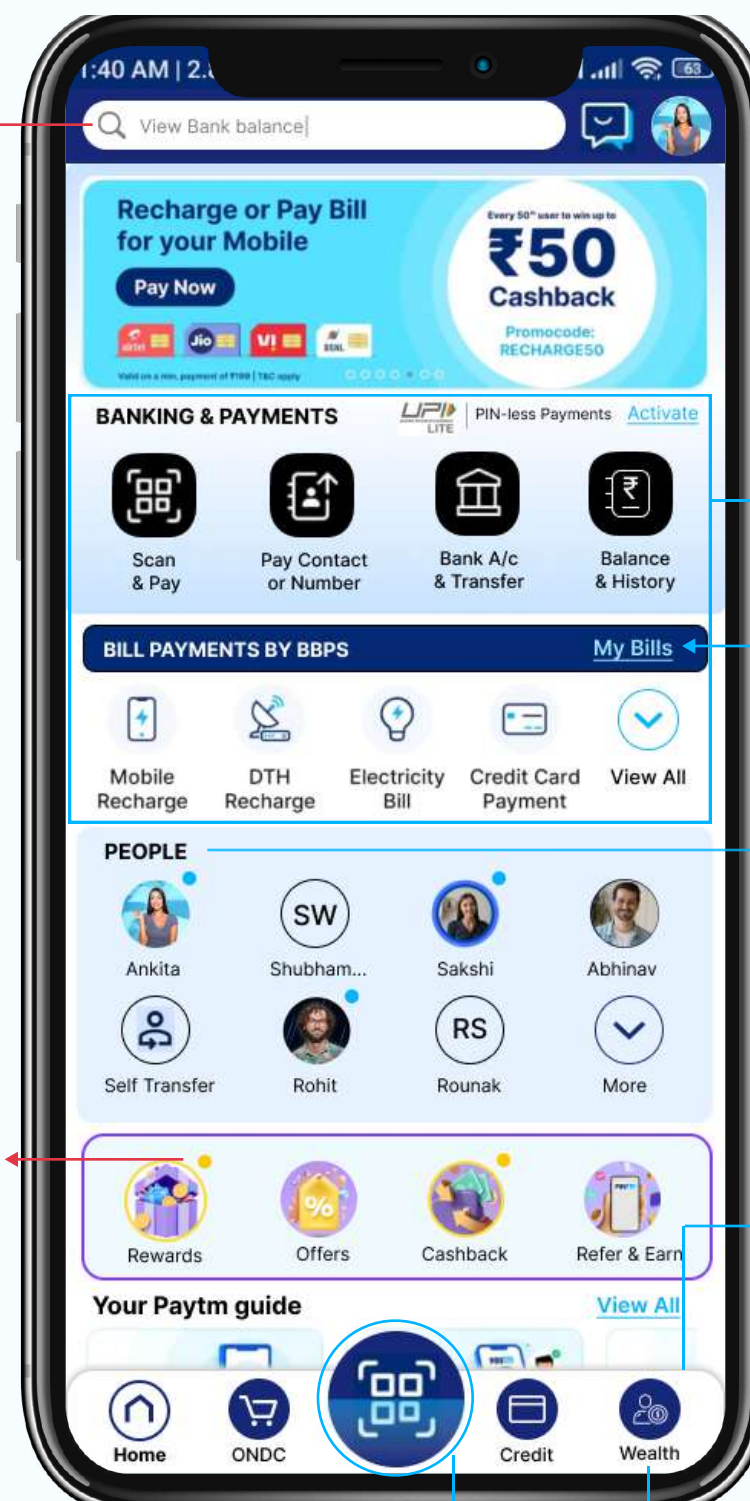

Search feature ←
(Easy navigation, **Live text** for user attention & personalized suggestion)

→ **Clumsy homepage**
Many features on single screen

Deals & Rewards section
Purple & Yellow colour,
attractive icons,new
notification indicator for user
call-to-action

Old bottom Navigation
Not much use of Cashback & Loan section
in the **most important “Navigation”** section

Simplified Payment section

Only 4 main features
Combined **Bank account & Transfer**,
Combined **Balance, History & Wallet**

- Only 4 features in a section

New People feature

- Easy payment to frequent receivers
- New notification indicator for user call-to-action
